CCAR Introduces “Hybrid Electric Vehicle Safety” as New S/P2 Course Module

CCAR announces the expansion of its “S/P2” e-learning program to include a “Hybrid Electric Vehicle Safety” module. The new module is designed to provide repair technicians with an awareness of regulations and safety procedures when servicing hybrid electric vehicles.

OVERLAND PARK, KAN. – The Coordinating Committee For Automotive Repair (CCAR) announces the introduction of “Hybrid Electric Vehicle Safety” module for its **S/P2** e-learning program. The new module is designed to promote awareness of regulations and safety procedures for repairing hybrid electric vehicles.

The module covers Occupational Safety and Health Administration (OSHA) regulations relating to hybrid vehicle safety, personal protection equipment and training. It also outlines proper safety procedures to minimize the risk of shock or electrocution to hybrid electric vehicle service technicians.

The new module is available at no additional cost to users of three versions of the S/P2 “Safety” course: S/P2 for Mechanical Service, S/P2 for Collision Repair, and S/P2 for Heavy-Duty Fleets.

“Awareness of safety issues surrounding hybrid electric vehicles is vital as the population of these vehicles grows every month,” said Daren Fristoe, CCAR President

(more)

and Chief Operating Officer. "This latest module is another example of how **S/P2** continues to evolve with the needs of our audience in the vehicle service community."

S/P2 (www.sp2.org) is an e-learning program developed by CCAR to address key safety and pollution prevention issues for automotive repair professionals. The training is based on U.S. Environmental Protection Agency (EPA) and U.S. Department of Labor, Occupational Safety and Health Administration (OSHA) standards, which require that personnel be trained on safety and environmental regulations at the beginning of their employment, and at least annually thereafter.

CCAR also operates "CCAR-GreenLink[®]," the National Environmental Compliance Assistance Center for Automotive Repair, in cooperation with the U.S. EPA.

Complete information on CCAR's **S/P2** e-learning program is available at www.sp2.org or by calling toll-free at 1-888-772-3535.
